I have partnered with Noveau Designs since 2003 when I began working for Juniper Hill Furniture as a design consultant. Over the years, Noveau Designs/Cathi Bales and team have been my source for custom bedding and window treatments.

I have worked on many projects from a simple pillow to an entire home filled with custom bedding ensembles and draperies. One particular project Juniper Hill and I had the pleasure of partnering with Noveau Designs began in the summer of 2007. Our clients had just purchased a fully furnished home for a corporate/family retreat. The project took two phases and almost two years to complete. The client wanted to refurnish the whole house and wanted each room to be comfortable, functional, and reflect their personal style. Noveau Designs fabricated every bedding ensemble and window treatment with all the trimmings. Juniper Hill, I, and Noveau Designs worked on every detail with our clients and the project was a grand success. Our clients were so pleased with the results that in spring of 2009 we were commissioned to Florida to work on their primary home. Our clients have since then, put the Florida home on the market and have purchased a new home in the surrounding area in Florida and have again asked us to be a part of making the home truly theirs.

Noveau Designs and Cathi Bales achieve project completion in a timely manner and with the utmost professionalism. Every project is presented with the most innovative designs, creativity, quality of work, and attention to detail. It is with these qualities that I am always assured that our clients enjoy the experience of designing the home of their dreams.
